## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 28-30, drawn to a method for reducing power to move a volume of gas through a vacuum pump, classified in class 29, subclass 888.021.
- II. Claims 1-27, 31-47, drawn to an apparatus of vacuum pump, classified in class 418, subclass 202.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the vacuum pump device as claimed does not required the milling channel in the second shaft to mating engaged the lobe and forming a suction section by engaging the lobe with channel and therefore can be made by a materially different process.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Thomas E. Kocovsky, Jr. on August 19, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3748

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
